

# Grant DuoWave System

Solar Cylinder & Heat Pump Cylinder Ranges

## Installation Instructions Addendum

The information regarding Standing heat losses on pages 4 and 5 of the manual has been updated following product improvements made in 2012. The corrected figures, as measured by WRc-NSF, are shown below.

Cylinder model	DuoWave Direct & Indirect Cylinders					
	170	200	250	300	400	500*
<b>Performance:</b>						
24hr standing loss (kW) - direct and indirect models***	1.38	1.54	1.77	2.09	2.69	3.30

  

Cylinder model	DuoWave HP Cylinders				
	170	200	250	300	400
24hr standing loss (kW)***	1.48	1.54	1.80	2.09	2.70

\* DuoWave Indirect only. \*\*\* Test carried out at 60°C.

Please retain this addendum with the original installation manual Part No. DOC 75. Rev 06. January 2011
