Solo

Fan convectors

Now available from Grant UK, the Solo fan convector range delivers effective heating while also considering a home's aesthetics. Incorporating intelligent technology, Solo low temperature fan convectors are compact in size and responsive to their environment making each model highly efficient. The range has been designed with style in mind, seamlessly fitting into a room's surroundings and providing flexibility with installation. Furthermore, the innovative Solo range allows homeowners to have precise control of the temperature, resulting in optimal comfort while minimising energy consumption.

Integrates with and complements low temperature systems, such as heat pumps

No thermostatic radiator valves required preventing unnecessary heat emission

Consumes significantly less energy compared to conventional radiators

Adjustable temperature controls to maintain comfort in all conditions

Faster rate of convection compared to conventional radiators

Maintains low surface temperature regardless of water temperature

Small and slim in size so ideal when space is at a premium

Precise heating management with individually controlled zones
