

AERONA SMART HEAT PUMP CONTROLLER

INTUITIVE DESIGN

3 HEATING ZONES+DHW

EASY SET UP

WEB BASED MONITORING & CONTROL

HEATING CURVE SELECTION

7 DAY PROGRAMMING

Designed for installation with both Aerona³ and Aerona 290 heat pumps, the AERONA Smart Controller is intuitive and stylish. Using advanced controller technology, the AERONA Smart Controller can help customers maximise the efficiency of their Grant heat pump system with weather and load compensation as well as heating curve configuration. The 4.5" colour touchscreen display is user-friendly to navigate and, when installed with the AERONA WiFi hub, the AERONA Smart Controller can be remotely accessed using an app or web-based portal.

AERONA SMART CONTROLLER

Features & Benefits

- Wall-mounted user interface with 4.5" colour touchscreen display housed in a stylish black casing
- Set and adjust your heating and hot water schedules with weekly or daily timed programming
- Access to core heat pump and system settings via a user-friendly navigation menu including clear, visual diagrams representing both the heat pump and system
- Stay in control even when you are away from home using the supporting app which enables remote access to the controller, allowing you to adjust settings (Aerona Smart WiFi Hub required)
- Dedicated web-based platform also available which can be used instead of or alongside the app to provide remote control of your controller (Aerona Smart WiFi Hub required)
- A system weather compensated controller, the Aerona Smart Controller monitors the outside temperature and adjusts your heat pump's operation to work at its optimum efficiency based on the outdoor conditions
- Compatible with wired and wireless thermostats which maintain the desired room temperature and provide temperature management for each heating zone
- Incorporates built-in user and installer assistants which support with the heat pump set-up, commissioning and long-term system monitoring

A playlist of handy videos about the Aerona Smart Controller is available to watch on Grant UK's YouTube Channel. The videos provide an overview of this intuitive heat pump controller as well sharing step-by-step demonstrations on how to set the core settings.

This playlist includes videos explaining the controller display icons, how to adjust the circuit temperature and heating schedule, setting up an ecoNET account and much more.
